## WORK EXPERIENCES

**2022 Nov - PRESENT**
Delphix | Remote

**Senior Software development Engineer 2** (Product: Data Virtualization App and Data Control Tower)
- Participating in requirement analysis and cross-team collaborations to develop robust designs and seamlessly translate them into functional modules.
- Working on grooming and presenting the assigned tasks with peers before development.
- Worked on key features on both the products. (Such as integrating oracle DB with Delphix products)
- Conducting internal product demonstrations for the sales team to showcase developed features.
- Efficiently managing defect triage, prioritizations, and resolution to drive continuous improvements in product quality and performance.
- Addressed Escalations and high priority bugs.
- Handled security vulnerabilities.
- Actively involved in conducting interviews for new hires.

**2020 June - 2022 Oct**
Factset | Remote

**Software Engineer 2 / Software Engineer 3** (Product: Analytics and Reporting, Publisher)
- Designed web apps using HTML, CSS, Fusion (FactSet's internal design library) also integrated RESTful API with UI and added functionality using VueJS.
- Worked on server-side apps as needed.
- Writing Unit Test Cases using Jasmine and E2E tests using cypress.
- Responsible for merging, developing to delivery to UAT and then up to production.
- Actively involved in designing and conducting interviews for new hires.
- Involved in giving KT to new joiners.

**2017 June - 2020 May**
Wipro | Hyderabad

**Senior Project Engineer** (Project: SOMOS: TFN registry)
- Designed web app using HTML5, CSS3, Sass, Bootstrap also integrated RESTful API with UI and adding functionality using Angular.
- Designed Customized Filters, directives and reusable services as per requirement.
- Involved extensively in writing Unit Test Cases using Jasmine.
- Responsible for writing LLD (Low Level Design) documents of the delivered features.
- Involved actively in PI (Program Increment) and sprint planning.
- Participated with end users, product owner and Business Analysis team.
- Involved in giving KT to new joiners.
- Owned my tasks from developing to delivery to UAT and then up to Go-Live.
